## Volume Control

Volume Control provides users with an easy way of controlling system volume using a widget that resides in your system tray. From this desktop gadget you can easily adjust the sound level according to your preferences. Volume Control is relatively easy to use. All you need to do is enter a percentage of the system volume that you would like to hear. However, if you want to mute the sounds, you only need to click a single mouse button. It is well crafted and simple to use. Another bonus is that the application uses a nice blue theme.

The question is: Is there life after the pyramids? In the end, is it possible to survive on a desert planet, surrounded by worlds of sand? Well, let's find out.

First, I must say that I was an exile during my exile. Because I was scrounging here and there for the things I needed. I was a skeleton, the fraying skin stretched over my skull. The fate of my people, the red-skinned elves, were my burden. As they left the forest of blue-green trees, from which the white, soft, and sometimes sweet wine was procured, to the cold, dangerous, and hostile icy lands, I was one of the last. I didn't go after the rest of them, because I was too weak. I couldn't even lift my hooves with me, let alone fight the snow creatures that tried to attack the refugees. I was far from the battlefields, where the fights for the ground were won, and lost. I stayed away. But from time to time I snuck to the edge of the forest, and watched the long, dark walk of the refugees, I saw the lights of their campfires. I thought, "If only I could join them! I could get food and water!" Then one day I woke up to find my skin had turned from white to pale blue-grey. The white desert sands around me had turned to deep blue. I had somehow survived the coming of the ice ages, but the cold still had my bones cold. I was still the only one left. The others were dead. But I still lived.

Now that the ice has come, my skeleton has become soft, and I live in a new world. The sun has finally come out, the clouds of gray have gone away, the dunes in the distance have become small hills, and the snow that covers the land is gone. My people are safe. The future is

## What's New in the?

1. New Quick Start option. Now you can easily start the quizzes by clicking the Start button on the first page. 2. Revisions of UI for Android and iPhone devices. 4. New optional Pop-up Tips feature.
